# How To Use Rentacrates

**No Assembly**    **No Tape**    **No Disposal Costs** **Environmentally Friendly**

## 1: Placing

Place 1st empty crate on crate dolly.  The heaviest thing you need to lift is an empty crate.

**Roll** the crate to items to be packed.

## 2: Packing

Pack files and contents up to the line 1/2" below the top of the crate.

Close the lid as shown.   Always pack the crates while they are on the dolly stack.

## 3: Labels

Affix move labels to the ends of the crates for easy identification.

## 4: Stacking

Place 2nd empty crate on top of the 1st, fitting it snugly between the interlocking notches.

Repeat packing steps.

Continue Pak-N-Stak™ process 3-4 crates high.

## 5: Ready To Go

Your mover can now quickly roll the stack away.

## 6: Unpacking

Simply reverse the Pak-N-Stak™ process, nesting 1 empty crate inside another.

Leave the dolly under the nested stack for mobility.
